PATIO

PATIO is an inner court open to the sky.
It is also an area that adjoins a dwelling and outdoor dining.
It is an area where people meet up for chatting, sitting and relaxing.
The elegantly designed triangular base is connected by
2 pairs of aluminum beams under the worktops.

The cable tower brings wiring vertically to the work surfaces,
and the excess wires can be freely placed on the simple designed cable tray or wire basket.

Cable tray under
work surfaces

The cable leg is sleek but strong, and it saves space for more leg room.

The utility rails on worktop enables the center panels to run sectional or in full-length.

Wire basket under work surfaces

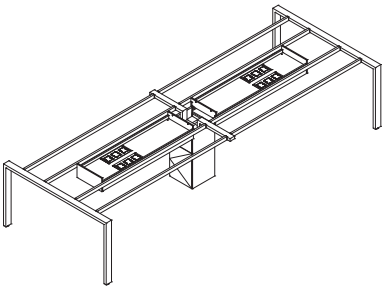

Flip-top on work surfaces

PATIO is designed for conferencing or meeting. It provides solutions to meet different requirements in work.
It can be arranged as a single work desk, a workbench, or a conference table.
